Editorial Comment

Someone remarks that the fiscal policy of our government seems to be to save a million and spend a billion.

NEW FACES COMING TO WASHINGTON

An amazing number of Senators and Congressmen are being defeated in their bids to return to Washington. Many men of long service are being retired by the voters.

It seems to us that this cannot be termed as a "swing" or as a "trend" to or away from either of the major political parties. Rather, it is, in our opinion, a matter between the individual candidate and the people of his district. Many voters lean to the view that although Congressman Blank has a long and distinguished record, the time in which we live demand a younger and fresher man on the affairs of the nation and of the world. We think that would apply to men like Senator Wheeler, who was recently defeated. After every war the people want a new outlook that copes with the new problems of "a bright new world." Some alert veteran may be the man who will win as a candidate, not because he runs as a Democrat or as a Republican, but because he represents youth, vigor, victory.

THE ARMY'S BLUES

From Winchester Star

Evidence that the Army is in serious about scrapping down its autocratic caste system when the War Department announces that the peacetime street uniform and only will be worn by all ranks but that elaborate parade are in the works to make sure that soldiers and the public will like it.

The War Department has made one decision about one new uniform. It will be blue. But whether it is to be solid blue or a two-tone affair has been left open. It has the question of the shade or shades to be prescribed, along with the colors of the shirts, ties, socks and shoes to be worn with it. All these matters are to be determined after sentiment has been tested out in the camps and after the public has had a chance to register its reactions.

This project is planned, says the official announcement, "to provide the people of the United States an Army uniformly attractive, and one to be proud of on parade, and also will insure individual soldiers a smart appearance during off-duty periods. That is, the effect must be both military and attractive.

The choice of blue is significant in itself. For many years the Army has favored olive drab or one of its relatives, on the ground that this color is practical in the field, although the argument lost its force with the advent of brass buttons and officers' "pinks." Now it is acting on the apparent belief that a uniform to be worn by privates and generals alike, in time of peace, can be colorful and yet not too different from civilian wear.

MAKING CHINA SAFE FOR KMA

From The Chicago Tribune

United States marines have had another shooting scrape with the Chinese in north China. The latest fight took place near Tural, on the railroad that hauls coal to coastal ports. Two weeks ago a marine truck convoy was ambushed in the region and several Americans killed.

The marines went into north China after the Japanese surrender, ostensibly to disarm and repatriate the Japanese armies in that region. The Japs have given up and gone home. The marines are still there. Their presence is regarded as a great assistance to Chiang Kai-shek's Nationalist government, and an equal hindrance to the Chinese Communists, who are blamed for the recent attacks.

The marines themselves don't know why they are still there. Some of them have said so in homesick letters addressed to the folks at the People. If our state department has any illusions that they are helping stabilize China, those illusions should have been theroly blasted by Gen. Marshall's day.

statement Saturday that it is impossible to arrange a peace between Chiang Kai-shek and the Communists.

But while America may not know why its marines remain in China, the British foreign office certainly must. Most of the mines in the area where the marines are stationed are operated by the Kailan mining administration, known in north China as KMA. This is one of the principal British investments in China. It and its corporate predecessors have been in operation 80 years.

Last year, Joseph Hearst of The Tribune discovered at Chinwan'ao, UNRRA shipped thousands of tons of flour into that port. It was turned over to KMA, which used it to pay off its miners. Other industries in the area asked similar allotments. They were turned down.

It may have been, of course, that these other industries were not selling their output to the right persons. KMA's coal goes to Shanghai, where it is sold by the Chinese coal monopoly. The coal monopoly is run by T. V. Soong. Mr. Soong is the brother of Madam Chiang Kai-shek. The Soong family make the Roosevelts look like pikers when it comes to identifying the national interest with their own pocketbooks. Brother Soong has apparently become one of the world's richest men during the years when his country was bleeding to death.

Keeping the marines in China is a very nice thing for Brother Soong. It's a very nice thing for KMA and its British stockholders. It's a very nice thing for the pinstripers in our state department, who delight in patronizing approval of Downing street. It's no so nice for the marines. They're getting killed.

AUNT LIZZIE HAS THE ANSWER

From Chatham Star

We read two editorials recently reflecting on old age. The Herald-Progress of Hanover editorialized on "How to Live Long," while the Franklin News-Post asked "Why Do People Grow Old?"

The editor of the Herald-Progress says that citizens who arrive at a ripe old age are always willing to give advice to others on how to climb the vine of life without rotting or drying up. The trouble is that few of them agree on the best course to follow to reach great old age. Some of them drink and chew and it doesn't hurt them; others are convin ed that a life of sobriety and self-denial are to be credited for their vigorous good health.

The News-Post editor says that "Youth is not a time of life—it is a state of mind," and explains that nobody grows old by merely a number of years; people grow old only by deserting their ideals. Years wrinkle the skin, but to give up enthusiasm wrinkles the soul. Worry, doubt, self-distrust, fear and despair—these are the long, long years that bow the head and turn the growing spirit back to dust.

You are as young as your faith, as old as your doubt; as young as your confidence, as old as your despair. So long as your heart receives messages of beauty, cheer, courage, grandeur and power from the earth, from man and from the infinite, so long are you young.

But perhaps the best recipe for health, happiness and long life comes from Aunt Lizzie Devers who recently died in Oklahoma at the ripe old age of 115, and who, on being asked what did she attribute her long life to, said "I mind my own business and I always have plenty of business to mind."

It is true in most cases that those who live longest are those who have worked hardest, those who prefer to wear out than rust out. A love of work, a zest for each day and its tasks, and a healthy curiosity about tomorrow, and minding your own business are more potent as life-preservers than all of the medicines in the drug store.

FASHION FUTURES

Let's get out the old crystal ball and gaze into the fashion future. How will you look going back to school in the fall? (We know how you feel, so let's not go into that!) We can see it all so clearly—and it won't be long before you will, too—right in the pages of Calling All Girls!

Tuck 'Em In—All the new skirts are made with tricky belted waistbands — perfect invitation to tuck in your tops. Better cut down on those double-malteds right away; you're going to need a good figure in the fall.

Co-Ed Coats—Your favorite all-purpose coat for fall will be a cotton gabardine lined with alpaca, just like your favorite Joe's been wearing. Just to think of it now makes you reach for another lemonade with plenty of ice in it!

Jersey for Jills—If your first fall date dress isn't a wool jersey we'll be very surprised. And if it doesn't have the new push-up sleeves, don't expect to be a fashion leader.

Fur Will Fly—Fur accessories will flatter you, especially those fur belts we're seeing in all the fall collections.

Scotch Stripes—What's more Hoot Mon than Scotch Plaids? Why, turned over to KMA, which used it to pay off its miners. Other industries in the area asked similar allotments. They were turned down.

It may have been, of course, that these other industries were not selling their output to the right persons. KMA's coal goes to Shanghai, where it is sold by the Chinese coal monopoly. The coal monopoly is run by T. V. Soong. Mr. Soong is the brother of Madam Chiang Kai-shek. The Soong family make the Roosevelts look like pikers when it comes to identifying the national interest with their own pocketbooks. Brain Interprets Images That the Eyes Receive

From the standpoint of psychology there are two kinds of seeing, points out the Better Vision institute. First is the physical reception of light by the eye, the focusing of the light rays on the retina and the messages telegraphed to the brain. This part of seeing usually is called "visual sensation." These sensations, however, need interpretation by the brain.

Visual relationships, as the size of objects or the speed of moving vehicles, largely are determined by the brain, guided by memories of past visual experiences. For example, if one person is near and another person a distance away, the visual image of one may be double the size of the other. But the brain, having learned through experience to make necessary judgments, "sees" both persons at about the same size. This interpretation of the facts provided by the eyes is called "visual perception."

For a person to possess good visual perception, obviously there must be a well-functioning eye to pass along to the brain undistorted visual sensations, continues the institute. If the messages arising from light rays are garbled through faulty reception, the brain will be unable to make accurate judgments.

For Stratosphere Flying

A war-developed airman's suit, nicknamed the "inverted fishbowl," has recently been displayed to the public by the army air force. The pressure suit enables air crew members to ascend to 62,000 feet altitude by maintaining normal pressure on the body. It resembles a combined deep-sea diver's suit and a large goldfish bowl. The low atmospheric pressure at the high altitudes for which this suit was developed would result in certain death, for internal pressure would rupture all blood vessels and inflate the human body until it burst. The pressure suit counteracts the loss of external pressure, and allows complete mobility of the individual at near stratospheric heights.

Milk Improves Fliers' Sight

Canadian fliers during the war improved their vision by drinking milk. Experiments conducted by the nutritional division of the Royal Canadian Air force conclusively demonstrated that fliers who drank their airmen could be materially improved by feeding them a substance known to scientists as riboflavin. An adequate amount of this substance could not be furnished without feeding them milk.

As a result of the work of the nutritional division, the amount of milk allowed per day per man was increased from a single ounce supplied at the beginning of the war, first to 10 ounces and later to 24 ounces per day.

THE SPLIT INFINITIVE

From T. J. W., Pittsburgh: I now cluck my tongue three times for your sin in writing, "The Royalist Party hopes to someday place Don Juan on the throne of Spain." Aren't you ashamed?

Answer: Such uncompromising purists as my pedantic assistant, Dr. Etaoin Shrdlu, D.D.T. (Doctor of Discombobulated Terminology), hold the the split infinitive is (and I quote), "a heinous and reprehensible disregard of the niceties of syntax" (and I unquote). However, the split infinitive is an honorable and useful construction which is often necessary and desirable to prevent awkwardness or ambiguity.

For my readers at large, let me explain the term "split infinitive." Simple verbs preceded by "to" are spoken of as infinitives, as: to go; to sing; to run; to place. When an adverb is inserted between "to" and the verb, the infinitive is "split," thus: to-quickly-go; to-sweetly-sing; to-swiftly-run; to-some day-place.

The split infinitive is common in modern literature, and is found in the writings of such noted authors as Herbert Spencer, Barrie, Browning and Byron. Byron used it so freely that he has been called "Father of the Split Infinitive" ("I'll slowly - trace the forest's shady sheen").

In some sentences, the split is unavoidable. For example: "This book is designed to-better-equip women for secretarial work." Otherwise, we should be forced to write: "... designed better to equip women, or ... designed to equip better women."

In my sentence, the split was desirable. If it had read, "... hopes someday to place," the adverb "someday" would have modified "hopes," which is not the thought intended. The Royalist Party does not "hope someday," it hopes today, now, at the present moment. If it had read, "... hopes to place someday Don Juan," it would have been still more ambiguous. Was "... hopes to-someday-place" the onslaught against the infinitive? Aren't you ashamed?

Opportunities in Nursing

The number of nurses in the United States had tripled since 1910. Nearly all the employed nurses now are women. However, male nurses will be in demand. The Veterans administration alone is planning on 300,000 beds in the next 20 years. For a woman considering a professional career nursing is an important possibility, since nurses represented one out of every four professional women. The unemployment rate has been quite low. The National League of Nursing Education, 1790 Broadway will give advice concerning any of the 1,300 approved institutions for nurse training. Further information may be obtained from your state board of nurse examiners or your state capitol or your local hospital.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D.D., Of The Moody Bible Institute of Chicago. Released by Western Newspaper Union.

Lesson for August 25

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education.

JESUS AND PURE LIVING

LESSON TEXT—Exodus 20:16-17; Matthew 5:27-28; 19:16-22; Romans 13:9; I Timothy 4:14-23; Matt. 5:8).

MEMORY SELECTION—Keep thy heart with all diligence; for out of it are the issues of life—Proverbs 4:23.

Moral corruption has been the ruin of the great nations of the past, and if history is not to be repeated by the fall of our own nation we must do something—yes, something prompt and drastic. The hearts of morals in our land is sick, and so widespread as to be a matter of concern to social and national leaders. What then, is the remedy for doing about it?

We do not like to talk about surgery and related subjects, but we must speak with care and tact to the point. Perhaps the time has come to be more straightforward dealing with this unpleasant situation.

I. Keep Your Home Pure (Exodus 20:14).

As the divinely appointed head of man's life, the home is the first place of such importance that the special target of Satan's attack is massive. That has always been the case, but it seems that in recent years the onslaught against the home has been intensified.

Any violation of the divine plan for the marriage of one man and one woman in loving communion is the founding and maintenance of a happy home, is a direct violation of God's law of God.

It is also a violation of the nature of man. It brings serious results in the destruction of the home, and in the ruin of individual lives, both moral and spiritual.

This awful sin (and there is no other wicked world could possibly be more sinful than anything else) is back of the divorce evil and divorces in American homes.

When we realize that in the city of Chicago there is now one divorce for every three marriages, and that the ratio is rapidly becoming greater, there can be no question but that divorce is a major evil and a curse. Statistics are positively appalling, but they are cold and quite impersonal. But who can fail to think of the broken hearts and who can forget the sorrow brought into American homes by divorce.

Bad as it is, the awful sin of parents is nothing compared with the nervous, moral and spiritual shock which comes to the children of broken homes. Statistics now (1946) more than 1,000,000 of the juvenile delinquents of young people committed to reformatories come from homes where divorce has entered to break down and destroy family life.

II. Keep Your Heart Pure (Prov. 4:14-23; Matt. 5:8).

Out of the heart are the issues of life (Prov. 4:23); hence the importance of keeping the heart pure. The utmost importance that the heart be kept pure and devoted to God.

The heart in Scripture usually does not refer to the physical organ which circulates the blood, but rather to the heart is the center of the inner life, so there is a spiritual heart which is the very center of the inner being.

Evil thoughts, unholy desires, ambitions hidden in the heart will ultimately be revealed by the fruits of ungodliness, unless they are repented to regenerate that heart and make it clean.

The solution for the problem of impurity is found in the following verses. First of all comes the way of the wicked (Psalm 119:9, 11, 17). They are so evil that they cannot sleep until they have led some poor souls and lives astray. They make sin and destruction so mysterious and attractive that they lead into sin by the power of curiosity.

Shun the evil way, turn your back down with increasing determination seeking the good way (Prov. 4:14-15). Keep on seeking the good way and more and more as the perfect day" (Prov. 4:18, 19). The way of the wicked is dark; their life is a bright and shining light. Don't let Satan fool the people, into thinking the Christian life is great to be a Christian.

III. Keep Your Body Holy (I Cor. 6:3).

The mind of man is very active (that is, if he is normal and awake), and it must be occupied with something. In the world, the flesh and the devil are keenly aware of this fact and come to fill his mind with evil sentiment, to sin and destroy.

Thank God that we have the Bible for things that are pure, lovely, true and noble to fill our minds and memory mental as well as spiritual treasures. God's promises are given either in scope or in detail, and provides the best, the most helpful, the loveliest and the purest.

Observe that it is by the power of Christ as our Savior that we can keep ourselves in diligent effort to overcome these things. As we study the Bible we find that they crowd out the evil, and by doing those things selfish or sinful. This is the principle of psychology and also of a spiritual admonition. Both of these works.

Clean Milk Comes From Modern Barns

Well Constructed and Clean Mangers Urged

Concrete dairy barn floors and mangers will prove a big help in producing milk of high quality as well as reducing the amount of labor required. The U. S. public health service milk code provides that no dairy barn meets the requirements for producing high grade milk without a long-lasting, non-absorbent, sanitary floor such as concrete.

Forms are made of one-inch lumber, well braced. Concrete for the floor is made with five gallons of water per sack of portland cement that no dairy barn meets the requirements for producing high grade milk without a long-lasting, non-absorbent, sanitary floor such as concrete.

Forms are made of one-inch lumber, well braced. Concrete for the floor is made with five gallons of water per sack of portland cement when sand and gravel are moist. The mix should be plastic and workable, but not too sloppy nor too stiff.

Barn floors and mangers properly designed and built help assure clean, comfortable, healthy stock—high quality milk.

Build the manger curb first; then the litter alley and the manger. Leave holes in concrete for future stall equipment if not now available. Then build stall platforms. These will vary according to the kind of cattle. The mangers should be finished with a steel trowel. The concrete should be damp cured for at least five days before using.

Know Your Breed

Guernsey

By W. J. DRYDEN

Valleywood Valiant Hero 235690, a grand champion Guernsey bull of registered performance.

The Guernsey breed originated on the small English channel island of Guernsey. The breed was brought to America as early as 1818.

The Guernsey is of medium size with fawn and white clearly delineated markings. Summary of 96,297 advanced registered records show the average production was 10,151 pounds of milk and 498 pounds butterfat. Some 83 animals produced over 1,000 pounds butterfat and 14 have lifetime records of over 100,000 pounds of milk.

Feeding Molasses to Salt Grass for Cows

Good stuff, the salt grass, Herefords say after they've sampled it. Photo—Food Mach. Corp.

Salt grass which cattle ordinarily will not eat may be covered with a solution of one-third water and two-thirds molasses. Power spray may be used economically with a 200-foot width.

Cattle fatten on the molasses and water combined with the grass, produce bigger and tastier steaks. Other similar uses may be devised for use of power sprays to meet individual requirements.

Weed Killer Shortens Farm Crop Maturity

Experiments in Hawaii and Puerto Rico with 2,4-D—miracle weed killer, indicate that it may control the growth of pineapples two years instead of three. It is generally believed that further experiments will prove that 2,4-D will shorten the time of maturity for many crops in America. Earlier maturing tomatoes, melons, corn, yams, potatoes and other farm crops are among those being experimented with.

Hixburg

Hixburg, August 20.—Misses Gertrude and Lavalette Sears spent several days at their home here this week.

A number of Hixburg people called to see Mrs. Sam Drinkard on Sunday afternoon. She is still in Lynchburg hospital. She is bright and cheerful and is improving, but she will be in the hospital awhile longer.

The Hixburg people also had a nice visit with Ruth Hix. She was looking well and glad to see us.

E. P. Sears and Mr. and Mrs. E. Sears were in Lynchburg on Monday.

Harry Gilliam, of Lynchburg, spent the week-end with his kin people here. He is just back from Nags Head, N. C., where he spent some time recuperating from an attack of rheumatism. He is much improved.

Mrs. N. S. Topping is out of the hospital and is staying with her sister, Mrs. Reese at Pamplin. We have missed her very much and are glad to hear that she is on the road to recovery.

Rev. J. H. Macrae filled his appointment at Hixburg Church on Sunday night. His message was a helpful one to all.

Mrs. Gertrude Reynolds returned to Richmond on Sunday. She expects to return to Mrs. J. R. Marshall's this week-end. Her sister, Mrs. Brooks will be there then.

Miss Carrie Hix entertained with a picnic supper Friday night, at the home of her brother, Wilson Hix. Those attending were Miss Mag Hix, Mrs. Morton Marshall, Mrs. E. W. Gilliam, Will Hix, Wilson Hix, Morton Marshall, Johnny, William and Tommy Hix.

Price ceilings on meat are restored by government board.

Army discovers hermit living in midst of active practice target area in state of Washington. He moves out when Army went after him.

President Truman on vacation.

Rocks News

Rocks, Aug. 19.—Farmers are still working with the hay crop.

Mr. and Mrs. W. R. Moore and daughter, Betty, left last Monday for Lynchburg, where they will visit Mrs. Moore's sister, Mrs. K. M. Almond a short while before returning to their home in Montgomery, W. Va.

Mr. and Mrs. J. P. Ranson, Jr., and children, Jack, Katherine and Tommy, of Norfolk, arrived last Monday afternoon to visit her mother, Mrs. D. R. Ingo, and also Mr. and Mrs. Toby Inge.

Mrs. Woodrow Fleshman and children, of Richwood spent last Sunday with her father, J. H. Ranson.

Joe Almond was helping J. W. Dickerson gather up vegetables for market a few days last week.

Mr. and Mrs. Jim Williams and children and Mrs. Ada Davis, of Pamplin were visiting Mr. and Mrs. R. C. Baldwin last Sunday.

Mrs. J. P. Ransone, Jr. and children, of Norfolk were visiting Mrs. Robert Roach Tuesday night.

Mr. and Mrs. Ernest Lee and Will Childress have moved from the McGhee place.
